# Lovely Daffodils

(ALL PRICES POSTPAID—PLEASE ADD SALES TAX, SCHEDULE ON PAGE 10)

**CULTURAL HINTS:** Bulbs of the Narcissus family, which includes Daffodils and Jonquils, are happiest in a sandy loam, since this affords good drainage. In a clay soil, sand and peat should be incorporated.

The depth to plant bulbs depends on their size. Big bulbs, such as King Alfred, can go down eight inches and smaller bulbs three and four inches. In light soils deeper planting is advisable, and in heavy, a shallower planting. The degree of light and shade should be taken into account. All of them thrive in sunshine, but the lighter, more delicate kinds, seem grateful for a bit of shade. Plant to north or east of a path if you wish to look into their faces, as they will always face the sun.

Fertilize with bonemeal, placed in the hole at planting time. The spacing apart is unimportant so long as there is sufficient room for a bulb to increase to approximately twice its original size. Overcrowding results in foliage without flowers. Never lift bulbs until foliage has completely yellowed. Fresh manure should never be used.

**HOW TO PLANT OUTDOORS:** For outdoor culture, in window boxes, or the garden bed, space the bulbs 6 to 10 inches apart. The depth of the top of the bulbs below the surface will vary from 3 to 4 inches, depending upon their size. A half handful of bonemeal mixed with soil in the bottom of planting hole will supply ample food.

**HYACINTHS ON WATER IN GLASSES:** Use only the first or Exhibition size bulbs. Place the bulb so its base merely touches the water. Keep in any cool, dark place until glass is filled with roots. # The Cream of the Roses

(ALL PRICES POSTPAID—PLEASE ADD SALES TAX, SCHEDULE ON PAGE 10)

Our rose bushes are handled as nature intended. They are not dug prematurely in full foliage, nor are they in any way treated to preserve them.

We grow our own roses at our Highway Nursery, located on the El Camino Real (U.S. Alternate 101 Highway), 2 miles south of Sunnyvale toward Santa Clara. Why not visit our fields during the Summer months?

We are very careful to bud our roses only on such wild understocks as are definitely superior for the variety. This enables us to offer bushes with a more vigorous constitution, evidenced by an extended season with more profuse blooms and long life.

We offer for our discriminating trade, only the most carefully selected, graded stock of 2-year old, budded field grown roses.
